| ENGLISH (Fluent)   | SPANISH (Intermediate) |
| UKRAINIAN (Native) | RUSSIAN (Native)       |

### HOBBIES

chess literature  
music swimming travel

### PROFILE

Frontend developer with 3+ years of experience in developing applications and E-commerce web sites. Ready to show my full devotion and involvement in a creative and motivated team. I have a passion to be up-to-date, constantly learning about new technologies and tools in programming and computer science in general. Being a positive and friendly person, I always try to work hard to reach the best results.

### WORK EXPERIENCE

#### FRONTEND DEVELOPING 2019 -2023

Developed responsible websites using HTML5, CSS3. Utilized JavaScript(ES6) to create logic and additional interactivity on the site. Developed applications with ReactJS. Created E-commerce web sites, using NodeJS, MongoDB and ReactJS. Wrote structured code with SCSS preprocessor. Set up with the GULP builder and Node Package Manager. Collaborated with a team using GIT version control and project hosting service GitHub.

### PROJECTS

#### ONLINE CLOTHING STORE PROJECT

- Developed login page.
- Implemented empty state for products, shopping cart (popup).
- Created and modified products for the database.
- Designed and customized admin dashboard.
- Constructed tabs for login and registration pages.
- Built login and registration forms.
- Established address book page.
- Designed and populated Wishlist page with backend products.
- Created user profile functionality.
- Developed shopping cart page and integrated cart item functionality.
- Implemented dropdown menu for categories.
- Constructed user data entry page with delivery address.
- Designed payment selection page.
- Implemented validation and logic for all the aforementioned pages.
- Created modal window for purchase confirmation.
- Developed My Account page for user data enrichment.

#### APPLE STORE PROJECT

- Created online apple store page, using ReactJS and Redux.
- Added the ability to add items to favourites and navigate to the shopping cart.
- Developed customer form using Formik.
- Developed the ability to delete items from the cart and favourites.
- Used react-redux to store global states of the components.
- Utilized: redux-toolkit / formik / react-router-dom / styled-components / yup / testing-library.

#### INSTAGRAM ADAPTIVE PROJECT

- Developed a fully responsive website for three versions: desktop, tablet, and mobile.
- Used a build tool GULP to automate the tasks.
- Developed styles with SCSS preprocessor.

#### MEDICAL APPOINTMENT APPLICATION

- Created the application using ES6 classes.
- Added adaptive version for tablet.
- To make an appointment, use this link <https://ajax.test-danit.com>
