NURSE FACULTY
2002 - 2006 | MEDICAL COLLEGE

LANGUAGES

ENGLISH (Fluent)   **SPANISH (Intermediate)**

UKRAINIAN (Native)   **RUSSIAN (Native)**

HOBBIES

chess   literature

music   swimming   travel

PROFILE

Frontend developer with 5+ years of experience in developing applications and E-commerce web sites. Ready to show my full devotion and involvement in a creative and motivated team. I have a passion to be up-to - date, constantly learning about new technologies and tools in programming and computer science in general. Being a positive and friendly person, I always try to work hard to reach the best results.

WORK EXPERIENCE

CIRCLE CLOUD COMPANY 2023-2024
Worked directly with backend engineers to define API contracts, optimize data flow, and resolve complex technical challenges.Played a critical role in decision-making for architecture and project workflows, ensuring efficient and scalable frontend-backend interaction.Led the design and implementation of key UI components and ensured seamless integration with backend systems through REST APIs and WebSocket protocols.

MENTOR (DAN IT EDUCATION) 2022-2023
- Guided junior developers in mastering React, JavaScript, and modern frontend practices.
- Conducted code reviews, provided constructive feedback, and supported projects.

SOFTWARE DEVELOPING 2017 -2024
Developed responsible websites using HTML5, CSS3. Utilized JavaScript(ES6) to create logic and additional interactivity on the site. Developed applications with ReactJS. Created E-commerce web sites, using NodeJS, MongoDB and ReactJS.

PROJECTS

WE UC BUSINESS PROJECT
- Implemented live notifications using web-sockets.
- Developed user management logic to create and edit users.
- Developed call flow settings: call forwarding, auto attendant, conference, voicemails, call recordings.
- Added validation for user management settings.
- Worked with call history, sip connections, filters.
- Developed logic for adding contacts, handling private and company types.
- Created default components as modals, switch buttons, react tables.

ONLINE CLOTHING STORE PROJECT
- Created login logic, registration and authorisation with NodeJS.
- Developed backend logic, api requests, validation, routers and config.
- Created data base on MongoDB, connected to server side.
- Implemented api logic on frontend, api queries to server, used Redux as a global store, displayed server errors to user for better user experience.
- Developed searching items, created colours, categories filters.
- Implemented shopping cart logic and design, used MUI library.
- Developed wishlist, payment and delivery details, using form(Formik).

APPLE STORE PROJECT
- Created online apple store page, using ReactJS and Redux.
- Added the ability to add items to favourites and navigate to the shopping cart.
- Developed customer form using Formik.
- Developed the ability to delete items from the cart and favourites.
- Used react-redux to store global states of the components .
- Utilized: redux-toolkit / formik / react-router-dom / styled-components / yup / testing-library.

MEDICAL APPOINTMENT APPLICATION
- Created the application using ES6 classes.
- Added adaptive version for tablet.
- To make an appointment, use this link https://ajax.test-danit.com
